Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 21, 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Okuda (U.S. Pat. No. 6,380,689).

As to claims 21 and 22, Okuda (figs. 1-2, 5-6) show a driving circuit for actively driving an organic electroluminescent display device in which a plurality of pixels (col. 1, lines 6-9), each containing an organic electroluminescent element, are arranged in a matrix, the driving circuit comprising: a reverse-bias setting circuit (see figure 6), which sets the organic electroluminescent elements to a reverse-bias state on an area-by-area basis (col. 5, lines 11-24), while the organic electroluminescent elements in one line of pixels are set to the reverse-bias state, the organic electroluminescent elements in the other lines of pixels emit light or writing to the other lines of pixels are carried out (see figure 14; col. 10, lines 20-31).

Allowable Subject Matter

3. Claims 1-20 are allowed because none of the cited references, either singularly or in combination, teach or fairly suggest that “a duration for writing to each pixel and the duration for

setting the organic electroluminescent element for each pixel to the reverse-bias state are separately set.”

Response to Arguments

4. Regarding claims 20-21, applicant's arguments filed 10/16/03 have been fully considered but they are not persuasive.

Applicant argues “claims 21 and 22 are allowable for reasons similar to those previously stated in connection with claims 1-20”

In that regard, the examiner disagrees with this statement because claims 21 and 22 are not identical to claims 1-20. In addition, claims 21 and 22 are clearly anticipated by Okuda (see the 102 rejection above).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2675

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
